GETTING STARTED
REMOTE CONTROL
The remote control has a battery installed. Please remove the tab for the battery to begin operation.
1. Locate the battery compartment on the side of the remote control.
2. Remove the dead battery and insert one 3V CR2025 battery (spare not included). Please ensure the battery is installed following the correct polarities (+/-).
3. Place the battery cover back and press until it locks.

INSTALLATION
1. Clean the surface you'd like to stick the light to.
2. Peel off the backing of the adhesive tape.
3. Press and hold the light strip firmly against the surface.
4. Connect the light strip in the correct order (see photo below, ensure arrows are aligned).
5. Connect the plug to the wall outlet the using the included 12V/3A adapter.

JOIN THE LED LIGHT STRIP TO THE USB RECEIVER/CONTROLLER
Attach the USB receiver/controller to the LED light strip as shown below. Connect the light strip in the correct order.

arrow

REMOTE CONTROL MUST BE CONNECT TO THE SIGNAL RECEIVER

NOTE: For optimal performance, place the receiver on the LED light strip away from your TVs receiver to avoid interference from your TV remote. Make sure the receiver is in line of sight on order for the remote to work.

OPERATING INSTRUCTIONS
1. Turn the LED strip light ON by pressing the ON button on the remote control.
2. Select a colour and effect, and push the corresponding button.
3. Set the colour brightness by pressing the brightness buttons.
4. Push OFF to turn the LED strip light OFF.
NOTE: The colour settings are mixed, and the colour tints may exhibit minor deviations.

TO CREATE DIY COLOURS
1. Press DIY1 button and light will show white. Press the down arrows above the DIY buttons, press red down button until all red is off, press green down button until all green is off, and press blue down button until all blue is gone.
2. When all colours are down the light strip will look off. Now you can add red, green and blue back in to create your own custom colour.
3. Press DIY1 again to set the colour
4. Repeat process with the 5 other DIY buttons.

APPLICATION
1. Use to decorate any room in your house, porch, desk, hotel, club, bars, vehicle, boat, TV, studio.
2. Decorate for Christmas, Halloween, weddings, birthday parties and more.
