USB power adapter

Apple Watch requires iPhone 5 or later. All models come in distinct case and band combinations. Sport, Woven Nylon, stainless steel and leather bands are all compatible with all Apple Watch models.

1. Apple Watch Series 2 has a water-resistance rating of 50 metres under ISO standard 22810:2010. This means that it may be used for shallow-water activities like swimming in a pool or ocean. It is also safe to wear it while showering or in a hot tub. However, Apple Watch Series 2 should not be used for scuba diving, waterskiing or other activities involving high-velocity water or submersion below shallow depth. Milanese Loop band is not water-resistant.

2. Compared with the previous generation.

3. Apple Watch Series 1 has a water-resistance rating of IPX7 under IEC standard 60529. Apple Watch Series 1 is splash- and water-resistant, but submerging Apple Watch Series 1 is not recommended.

4. Apple Watch battery testing was conducted by Apple in August 2016 using preproduction Apple Watch Series 1, Apple Watch Series 2 and Apple Watch Edition, each paired with an iPhone; all devices were tested with prerelease software. Battery life varies by use, configuration and many other factors; actual results will vary. See www.apple.com/ca/batteries and www.apple.com/ca/watch/battery.html for more information.
